THIS IS UNEVALUATED INFORMATION

50X1-HUM

1.

Dr G Mansfeld recorded the progress of his research in tuberculosis in a 1948 issue of the Swiss journal, "Experientia." 50X1-HUM the project was primarily concerned with the effect of the central nervous system on immunity to tuberculosis and the research was not completed 50X1-HUM

The general aim of the research in blood cell regeneration was to find or synthesize a drug that would help anemic patients to regenerate blood. The researchers were working on two specific phases in 1949, the effect of darkness on red blood cell regeneration, and the effect of an oil 50X1-HUM on blood regeneration. None of the research was complete in 1949

Dr Mansfeld had spent over 30 years of his professional life in research on the influence of the thyroid gland on heat regulation. 50X1-HUM his textbook in German on the physiology of the thyroid gland gives details of his work.

2.

There was no Hungarian Academy of Medical Sciences in existence in 1949.
